

Changing Email Passwords Through Webmail

Log on to your webmail account by entering your webmail URL (webmail.YourDomainName.xxx).

The screenshot shows a webmail interface for 'mike@vandling.net'. The mailbox name 'mike@vandling.net' is in the top right corner. A dropdown menu is open below it, listing various settings: Horde, Roundcube, SquirrelMail, Password & Security (highlighted), Configure Mail Client, Calendars and Contacts, Email Filters, Forwarders, Contact Information, and Track Delivery. A red arrow points from the mailbox name to the dropdown menu, and another red arrow points from the 'Password & Security' option to the main email list area.

Choose Password & Security from the drop down arrow below the mailbox name.

The screenshot shows a web browser window with several tabs open. The active tab is titled "Webmail - Password & Security" and the address bar shows the URL "webmail.vandling.net/cpsess4056714231/webmail/paper_lantern/mail/change_password.html". The browser's bookmark bar contains various categories like "Apps", "Mikes CV Bookmarks", "Personal", "psr-970", "Review", "Temporary", and "Z-Archived".

The webmail interface features the "CourseVector" logo in the top left and a user profile "mike@vandling.net" with a "LOGOUT" link in the top right. The main heading is "Password & Security". Below it, the instruction "Enter a new password for this account." is displayed. The form includes two input fields: "New Password" and "Confirm New Password". A "Password Strength" indicator shows "Very Weak (0/100)". A "Password Generator" button is located to the right of the strength indicator. A blue "Save" button is positioned at the bottom left of the form area.

At the bottom of the page, the "cPanel 60.0.26" logo is visible on the left, and navigation links for "Home", "Trademarks", "Documentation", and "Help" are on the right. The Windows taskbar at the very bottom shows the system tray with the date and time "5:40 PM 12/9/2016".

Enter your new password and click the Save button. All done!
